### **DETAILED ACTION**

This office action is in response to the Petition of restriction requirement filed October 29, 2008. Applicant argument regarding the type of restriction is persuasive, however a restriction for the distinct invention is appropriate. Therefore, the last restriction is withdrawn and a new restriction as indicated below is applied.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 87-92, 148, 149, 150-161 and 162-166, drawn to financial institution receiving a pseudo credit account identifier, classified in class 705, subclass 74.
- II. Claims 93-104, 105-122, 123-132, drawn to a privacy server configured to facilitate transaction and to provide a fictitious payment information or pseudo payment, classified in class 705, subclass 79.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a privacy server configured to facilitate a transaction between a seller and a buyer. This separate use distinguishes the invention of group II from group I, since the privacy server the facilitate transaction between seller and buyer, wherein the transaction involves one or more entities in addition to the buyer, seller and the privacy server is not limitation of those independently claimed inventions of Group I. Therefore the invention of group II is a separately useable subcombination. See MPEP § 806.05(d). Examiner considers that since applicant independently

claim the invention of this group, it is prima facie showing that the inventions are intended to be independent and distinct and are shown to be separately usable.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
